

dr hab. MARIUSZ HAMULCZUK, prof. WULS

Researcher at Warsaw University of Life Sciences, Department of International Economics and Agribusiness. His main scientific interests are agricultural commodity markets, the vertical and spatial integration of agri-food markets, and the analysis and evaluation of EU agricultural and rural development policies. His interests also include the application of quantitative models in economic research, particularly time series modelling and forecasting economic phenomena.

Member of the Scientific Council of Statistics, operating under the President of Statistics Poland, serving as an advisory and consultative body on matters of statistical research methodology. He has authored or co-authored over 100 scientific papers, and five books. During his scientific career, he has presented papers at more than 90 international or national scientific conferences.

He has experience with many international projects focused on agricultural economics, e.g., AGMEMOD 2020, ECONWELFARE, and ADVANCED-EVAL. In 2005–2010 and 2011–2014, he participated in Multi-Annual Research Programs aimed at assessing the competitiveness of the Polish food economy in the conditions of globalisation and European integration. He is also the author or co-author of several expert opinions on the diagnosis and analysis of agricultural functioning and its various sectors, as well as on policy evaluation. He was involved in the evaluation of the UE agricultural policies, e.g., Mid-term and Ex-post Evaluations of RDPs. Since 2009, he has been a member of the AGMEMOD consortium, which models agricultural markets in the EU for use by the European Commission, among others. Editor-in-Chief of the Scientific Journal WULS-SGGW “Problems of World Agriculture”.
